

# Revision history for repwr repository

*Nathan (Nat) Goodman*

*May 3, 2018*

## **Release 0.93 2018-05-dd**

- Removed obsolete scripts including scope.R and distr.R
- Added current script: repwr.R
- Split repwr.R into separate files
- Removed other obsolete files
- For data, added current top-level files needed for analysis and plotting. Did not add data subdirectories as these are huge (261MB for m=1e3, 980MB for m=1e4) and not needed once the simulation is done

## **Release 0.92 2018-01-01**

### **scope.R**

- Added plot\_cross, plot\_pclose1
- Integrated d2t probability functions from distr.R
- Systematically precomputed useful data tables: d1, d33, dcross, dsig, dclose, dcrit

### **distr.R**

- Added pval2t, pval2d functions
- Corrected usage of lower.tail parameter in d2t probability functions

## **Release 0.91 2017-12-19**

- Change sampling distribution from normal to noncentral t.
- Remove unused code.
- Clean up code for translating Cohen's d to t-statistic and t-distribution; simplify function names.

## **Release 0.90 2017-12-07**

First version. Ready for feedback from external readers.
